

# SAFETY MEETS ART...

... at the intersection of The BLVD and Ehrlich Avenue, where *The Art of Chase* connects Lancaster to the worldwide crosswalk art movement. Brightly painted crosswalks featuring uniquely relevant designs are all the rave in highlighting the safest way for pedestrians to get from point A to point B when crossing the street.

The City's installation of a one-of-a-kind series of murals in its downtown cultural center represents road marking stencils of symbols, letters, and arrows patterned and layered to catch the eye. Thanks to Belgian artist Chase, this growing trend of instantly recognizable 'street art' now graces The BLVD as an enhanced safety measure... one of Lancaster's many Smart City advancements.
